

Museum at launch pad 2

Written by Administrator

The Museum of Baikonur cosmodrome was founded in January 1965. The idea of creating a museum belongs to the Chief designer of space rocket systems S.P. Korolyev and the head of the cosmodrome K.V. Gerchik. The museum consists of six exposition halls.

Four halls tell about the history of formation and development of the cosmodrome, two halls are dedicated to international cooperation in space. The exposition hall presents the information about enterprises of space industry and the history of the fifth State test cosmodrome of the Ministry of defense. Nowadays the Museum contains more than 10000 exhibits having historical and cultural value.
